

## Perfect Fit. Perfect Sound. hearos by bachmaier® celebrates its premiere at Prolight + Sound 2025 in Frankfurt

***Bischofswiesen, 8 April 2025*** – bachmaier GmbH is presenting the hearos brand for the first time at Prolight + Sound in Frankfurt. The new in ear monitoring systems combine precise sound reproduction with innovative technology and maximum wearing comfort – developed for musicians, sound engineers and all those who rely on uncompromising sound on and behind the stage. ‘Perfect Fit. Perfect Sound.’ – the promise that hearos fulfils with every model. Whether customized or as a unifit version: the In Ears offer a clearly defined sound, a secure fit and a sound experience that will inspire you.

### **Innovative monitoring – for professionals on stage and at the mixing desk**

hearos 35, 33, 22 and 22mini in ear systems are available as either customized customfit or ergonomically optimised unifit versions. Thanks to modern 3D printing technology and exclusive sound engineering, each model delivers a performance previously only known from the recording studio. Whether musician, FOH engineer or lighting technician – the new hearos help all stage professionals to concentrate fully on their performance.

### **Overview of the hearos models**

hearos 35 – 3-way system | 5 drivers

Studio sound quality on the go. With uncompromising clarity and precision, this model authentically reproduces every musical nuance. The lively-sounding flat frequency response captures every note without distortion, as if you were in a recording studio.

hearos 33 – 3-way system | 3 drivers

The hearos 33 model impresses with rich bass, balanced mids and crystal-clear highs. It brings every musical nuance to life – regardless of genre or style.

hearos 22 – 2-way system | 2 drivers

Specially developed for the stage, hearos 22 offers outstanding precision and depth of sound. With one woofer and one tweeter driver, it delivers a rich, voluminous sound – ideal for stage musicians.

hearos 22mini – 2-way system | 2 drivers

Despite its compact design, hearos 22mini impresses with a crystal-clear sound image that comes close to that of hearos 35. The carefully tuned bass complements any style of music and enables outstanding transparency and speech intelligibility, ideal for discerning listeners with smaller ear canals – without compromising the sound image.

### **Unifit – One fit for (almost) all**

Based on over 1,000 evaluated ear molds, bachmaier® has developed a hearos unifit shell design that fits most users perfectly – without the need for individual molds. Ideal for all those who value flexibility and quality in equal measure. Now available in the bachmaier® online shop.

## **Innovation & craftsmanship**

Thanks to state-of-the-art production techniques and exclusive sound engineering, the new hearos models take sound to a whole new level. With 3D modelling and high-tech printing processes, the drivers and sound channels are positioned precisely – for a detailed, powerful sound. 'Our in ears deliver an unrivalled sound experience – musicians hear their performance as it really sounds,' emphasises Michael Haider, Product Manager hearos at bachmaier®. 'Thanks to 3D printing and precise driver architecture, we achieve a sound signature that sets new standards.'

## **As individual as your sound – in "hype colors"**

All customfit models are available in thermo-flex or acrylic. Choose from 3 case colours, 57 faceplate colours and 15 logo colours – or make a statement on stage with your band or artist logo. The unifit models are made of acrylic.

## **Live demo & molding at the trade fair**

Visit us at our stand D15 in hall 11.0 for exclusive live demos and personalised advice. During the trade fair, we will be offering free ear moulds for your custom-made in ears.

## **Hearing innovations from the Alps**

bachmaier GmbH, based in Bischofswiesen, has been developing, manufacturing and distributing customized products for hearing acoustics, hearing protection and the music industry for over 30 years. With around 90 employees, production sites in Germany and Hungary and a Europe-wide partner network, bachmaier® stands for quality, precision and innovation.

## **Experience it now at Prolight + Sound 2025**

Fabian Kubicke (CEO bachmaier), Marco Leipold (COO bachmaier), Michael Haider (Product Manager hearos), Paul Steinbach (Head of Sales) and Melanie Streif (Event & Events bachmaier) will be available for discussions, demonstrations and individual advice at stand D15 in hall 11.0.
